Work Experience

No professional work experience yet (Fresh Candidate). Currently focusing on improving development skills and building practical projects.

Projects

Pharmacy Management System — Jun 2025

Web Application — .NET Core, SQL Server

- Developed a robust pharmacy system with separate panels: User Panel and Admin Panel.
- Allowed users to browse, search, and purchase medicines with an intuitive interface.
- Implemented a shopping cart feature for efficient medicine management.
- Designed a feedback system displaying a conversation history between users and admin.
- Enabled admin to manage medicine inventory, including adding, updating, and removing medicines.

Watch Hub — Aug 2025

Mobile Application — Flutter, Dart, Firebase

- Developed a mobile application for browsing and purchasing watches.
- Implemented user registration, login, and personalized watch recommendations.
- Integrated Firebase for real-time data storage and authentication.
- Designed an interactive UI with smooth animations for an engaging user experience.
- Enabled users to add watches to wishlist and shopping cart for purchase.

Event Management System — Jun 2026

Full Stack Web Application — .NET Core, SQL Server, HTML, CSS, JavaScript

- Built a complete event management platform with User and Admin panels.
- Enabled users to view events, register, and provide feedback.
- Admin module allows creating, updating, and managing events efficiently.
- Integrated secure authentication and role-based access for users and admins.
- Designed interactive dashboards for users and admins to manage event data.
